Reg No.: 25MIM10222
Branch: artificial intelligence
Year: 1st Year
Course Code: CSE0001
Course Title: Digital Literacy

INTRODUCTION:

This project is based on digital literacy, which is an essential skill in today's digital world. As a student digital ambassador, my role is to help others understand how to use digital tools safely and effectively. This project includes tasks like creating an infographic, building online profiles, exploring platforms, writing professional emails, and understanding cybercrime

TASK 1 – Infographic:

I created my digital literacy infographic using Canva. The design focuses on three main topics: digital literacy basics, safe internet practices, and professional online presence. In the infographic, I explained that digital literacy means the ability to use digital tools effectively and responsibly. I also included examples like using email professionally, protecting personal data, and avoiding unsafe websites.

I used simple icons and colors to make the infographic visually attractive and easy to understand for students. One interesting thing I learned was how to organize information in a clean and engaging way. The difficult part was selecting the right design and keeping the content short but meaningful.

Overall, this task helped me understand how important digital literacy is in today's world.

TASK 2 – Digital Portfolio:

I created profiles on GitHub, LinkedIn, and Hacker Rank. GitHub is used to store and share coding projects, LinkedIn is used for professional networking, and Hacker Rank is used for coding practice. On GitHub, I created a README file with my details. On LinkedIn, I added my education details.

In the next four years, I plan to use GitHub to upload my projects, LinkedIn to connect with professionals, and Hacker Rank to improve my coding skills. These platforms will help me build my career and improve my technical knowledge.

TASK 3 – Platforms:

I used Hacker Rank for coding practice and solved a beginner-level problem. It helped me understand basic programming concepts. I also created a Google Form with 5 questions related to digital literacy awareness.

This task helped me learn how to use online platforms for learning and collaboration. These tools will help me in my academics by improving my coding and communication skills.

TASK 4 – Emails + Checklist:

Email 1

Subject: Request for Extension of Assignment Deadline

Dear Sir/Ma'am,
I hope you are doing well. I am writing to request an extension for the assignment submission due to some personal reasons. I would be grateful if you could grant me a few extra days.

Thank you for your understanding.
Yours sincerely,
[Your Name]

Subject: for Summer Internship

Dear Sir/Ma'am,
I am a first-year integrated M.tech student and I am interested in applying for a summer internship at your organization. I am eager to learn and gain practical experience.

Thank you for your time.
Sincerely,
[Your Name

Social Media Do's & Don'ts

Do's

- Think before posting
- Use strong passwords
- Be respectful
- Share useful content
- Keep profile professional

Don'ts

- Don't share personal info
- Don't spread fake news
- Don't use abusive language
- Don't click unknown links
- Don't overshare

TASK 5 – Cybercrime

While researching cybercrime, I was surprised to see how easily people become victims of phishing and online fraud. Even simple mistakes can lead to serious problems. I will be more careful while clicking links and sharing personal information.

CONCLUSION

This project helped me understand the importance of digital literacy. I learned how to use digital tools, communicate professionally, and stay safe online.
